

## Summary of Qualifications

Montez Group is a Material Testing Company specializing in the testing of Aggregate, Concrete, and Soil, as well as Special Inspection of Aggregates, Reinforced and Prestressed Concrete, Soil, Rebar, Fireproofing, Commercial Building Inspection, Fiber Reinforced Concrete, Structural Steel and Bolting, and Structural Masonry. Our founding members have an extensive history in the industry and strive to provide high-quality, precise, replicable results for your material testing and special inspection needs.

Our headquarters is located in the heart of San Francisco, CA. We are a certified SBE/LBE, and we have extensive history with working with public agencies all around the San Francisco Bay Area. At Montez Group, our commitment is to deliver not just accurate and precise test results but to do so with firm attention to detail and to cultivate trust with our valued clients.

Montez Group utilizes knowledgeable and highly trained technicians who have extensive experience in a wide range of testing standards including AASHTO, ASTM, and Caltrans test methods. Our projects encompass a broad range of industry segments, and we have a wealth of experience to draw upon. We are well-prepared to use our experience and expertise to help our clients ensure their project meets all industry standards and job specifications.

### Accreditations & Certifications:

- AASHTO & ASTM Aggregate, Concrete, and Soil Testing
- ACI, ICC Special Inspection for Aggregates, Reinforced/Prestressed Concrete, Soil, Rebar, Fireproofing, Commercial Building Inspection, Fiber Reinforced Concrete, Structural Masonry, and Structural Steel and Bolting
- HCAI Accreditation
- DSA Lab Evaluation and Acceptance (LSA) Program
- CCRL Accreditation
- AASHTO Accreditation
- Radioactive Material License #8451-38
- OSHA Safety Training

### Core Services:

Material Testing  
Special Inspection  
Nuclear Gauge Density  
Expert Witness/Auditors  
Quality Control/Quality Assurance

### Testing Certifications:

Nuclear Gauge Density & Moisture  
Sand Cone  
Soil Permeability  
Soil Compaction Curves  
Soil Classification  
Specific Gravity  
Moisture Content  
Sieve Analysis  
Materials Finer than #200 Sieve  
Organic Impurities  
Sand Equivalent  
Plasticity Index  
Compressive Strength of Concrete & LCC  
Air Content  
Slump  
Unit Weight of Concrete  
PLCC Permeability
